## CITY PAVILIONS

*The pick of the national shows sited in the grand old buildings of Venice*

### **1 Zilvinas Kempinas: Tube** Lithuania, Scuola Grande della Misericordia

Using the ancient medium of unspooled videotape, Kempinas has made a circular tunnel through which to walk. It looks so simple, yet must have been mind-boggling to create. It's very effective in the immense, crumbling building, and mesmerising to stroll through, especially when the breeze rustles the endless lines of tape. In its evocation of Venetian blinds, with their blurring of inside and outside, it's reminiscent of Haegue Yang's Korean Pavilion (see p105).
